## D4 Gerrymandering and Solutions - SOLUTIONS

## Group Activities

1. Azavea, a data analytics organization, has calculated the efficiency gap for all 50 states. We will first look at the infographics together. https://www.azavea.com/blog/2017/07/19/gerrymandered-states-ranked-efficiency-gap-seat-advantage/
2. You have just been hired as consultants to your state legislature in the re-districting of the state. To assess the current map below, calculate the efficiency gap.

Election Results:

Democrats win
$\qquad$
3 seats

Republicans win
$\qquad$ seats

| District | $\mathbf{D}$ <br> Votes | $\mathbf{R}$ <br> Votes | D Surplus or <br> Wasted Votes | R Surplus or <br> Wasted Votes |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 4 | 1 | $4-3=1$ | $\mathbf{1}$ |
| 2 | 2 | 3 | 2 | $3-3=0$ |
| 3 | 0 | 5 | 0 | $5-3=2$ |
| 4 | 5 | 0 | $5-3=2$ | 0 |
| 5 | 3 | 2 | $3-3=0$ | 2 |
| 6 | 2 | 3 | 2 | $3-3=0$ |
| 7 | 2 | 3 | 2 | $3-3=0$ |
| Total | 18 | 17 | 9 | 5 |

5. Is this a fair map? Why or why not?
6. Now it is time for re-districting and you get to draw the lines. There are three rules:

## Rules

1. All legislative districts must contain the same number of people.
2. Districts must not be drawn according to race or ethnicity.
3. District must be contiguous - no split districts allowed
a. Use packing and cracking to win as many seats as possible for the Democrats and calculate the efficiency gap.

Election Results:

Democrats win
$\qquad$ seats

Republicans win
$\qquad$ 1 seats

| District | $\mathbf{D}$ <br> Votes | $\mathbf{R}$ <br> Votes | D Surplus or <br> Wasted Votes | R Surplus or <br> Wasted Votes |
| :---: | :---: | :---: | :---: | :---: |
| 1 | 0 | 5 | 0 | $5-3=\mathbf{2}$ |
| 2 | 3 | 2 | $3-3=0$ | 2 |
| 3 | 3 | 2 | $3-3=0$ | 2 |
| 4 | 3 | 2 | $3-3=0$ | 2 |
| 5 | 3 | 2 | $3-3=0$ | 2 |
| 6 | 3 | 2 | $3-3=0$ | $\mathbf{2}$ |
| 7 | 3 | 2 | $3-3=0$ | $\mathbf{2}$ |
| Total | $\mathbf{1 8}$ | $\mathbf{1 7}$ | $\mathbf{0}$ | $\mathbf{1 4}$ |

b. Use packing and cracking to win as many seats as possible for the Republicans and calculate the efficiency gap.

| Election Results: | District | D Votes | R Votes | D Surplus or Wasted Votes | R Surplus or Wasted Votes |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Democrats win | 1 | 2 | 3 | 2 | 3-3=0 |
|  | 2 | 3 | 2 | 3-3=0 | 2 |
| 2 | 3 | 5 | 0 | $5-3=2$ | 0 |
|  | 4 | 2 | 3 | 2 | 3-3=0 |
| Republicans win | 5 | 2 | 3 | 2 | $3-3=0$ |
|  | 6 | 2 | 3 | 2 | 3-3=0 |
| 5 se | 7 | 2 | 3 | 2 | $3-3=0$ |
|  | Total | 18 | 17 | 12 | 2 |

7. Now let's check proportionality.
a. Find the overall percentage of Democrats in the state, and the percentage of Republicans. Shade the percentages in the overall population bar below.

$$
\frac{18}{35} \approx 0.514 \text { or } 51.4 \%
$$

b. Then shade in the number of seats won with each map.

Overall Population:

```
R D
```

Current Map
Efficiency Gap: 11.4\%

Map Gerrymandered for Democrats
Efficiency Gap: 40\%

Map Gerrymandered for Republicans
Efficiency Gap: 29\%
8. Using the graph below, estimate the number of extra seats held by the majority party in the current House of Representatives.

Source: https://www.brookings.edu/blog/fixgov/2017/02/22/misrepresentation-in-the-house/

Over-representation of majority party - measured in Congressional seats (compared with distribution of the votes)

## Fair or Proportional Representation

8. Divide the state into two larger regions so that one will elect 4 representatives and the other will elect 3 representatives. Try to make the representation as proportional as possible.

District 1: 4 seats: $\mathbf{4 \times 5}=\mathbf{2 0}$ seats
10 R, 10 D

District 2: 3 seats: $3 \times 5=15$

7 R, 8 D

|  | $\mathbf{R}$ |  | 2 |  |  |  | $\mathbf{R}$ |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
|  | $\mathbf{R}$ | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{R}$ | $\mathbf{D}$ |  |  |
|  | $\mathbf{R}$ |  | $\mathbf{D}$ | $\mathbf{D}$ |  |  |  |
| $\mathbf{R}$ |  |  | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{D}$ |  |  |
|  |  | $\mathbf{R}$ | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{R}$ |  |
| $\mathbf{R}$ |  |  | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{R}$ | $\mathbf{R}$ |  |
|  |  | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{D}$ | $\mathbf{D}$ |  |  |
|  |  |  | $\mathbf{D}$ | $\mathbf{R}$ |  | $\mathbf{R}$ |  |
|  |  | $\mathbf{R}$ | $\mathbf{R}$ |  | $\mathbf{R}$ |  |  |
| $\mathbf{R}$ |  |  |  |  |  |  |  |

9. An extra map to play with.
