

## Chapter 4 Group Activity

## 4B: Simple and Compound Interest

Group Activity

Use a spreadsheet on a Chromebook, smartphone, laptop or tablet to work on these problems. Write down the spreadsheet syntax to show your work.  
For example: =FV(.05/12, 2\*12, 0, 1000).

Answer each question in a complete sentence.

1. Your uncle is giving you a simple interest loan of \$500 for one year at 4% interest. What is the total amount you will owe him?

2. You borrowed \$1500 from another relative. She charged you 5% APR, compounded monthly. If you paid her back 2 years later, how much money did you give her?

3. You got a bonus of \$7,500 and you want to start a college fund for your child. You find an account paying 9.75% APR compounded quarterly. If your child just turned two years old, how much will you have when they turn 18?

4. Calculate how much you would have in problem 3 above if it was compounded continuously instead of quarterly.

5. If you are considering a credit card with an APR of 27.49%, compounded daily, what annual rate are you effectively paying?

6. How much would you need to deposit today to have one million dollars if you can find an account that pays 10% interest compounded daily for 50 years?

**4C,D: Savings Plans and Loan Payments**

Use a spreadsheet to work on these problems. Write down the syntax to show your work. Answer each question in a complete sentence.

7. Janelle is 34 years old. She would like to have one million dollars in her retirement account when she is 65 years old.

- a. How much would she need to deposit every month into an account with an APR of 7.25%, compounded monthly, to achieve her goal?
  
  
  
  
  
  
  
  
  
  
- b. If Janelle had started the account at age 21 (same APR), how much would she need to deposit every month to achieve her goal?
  
  
  
  
  
  
  
  
  
  
- c. If Janelle had started the account at age 21 (same APR) and deposited the amount calculated in part (a) every month, what would the balance be when she retired at age 65?
  
  
  
  
  
  
  
  
  
  
- d. How much would Janelle need to deposit as a lump sum at age 21 with the same APR (without making another payment) to have a million dollars at age 65?

8. Kimmy has a student loan of \$30,000 at a fixed APR of 4.45%. If they want to pay it off in 15 years,

- a. How much would they pay per month?

- b. How much would they pay in total?
  
  
  
  
  
  
  
  
  
  
- c. What percentage of the total was paid toward the loan amount of \$30,000 and what percentage was paid toward interest?

9. You want to buy a \$350,000 home. You plan to put 10% down and take out a 30-year fixed mortgage on the rest.

- a. What will the loan amount be?
  
  
  
  
  
  
  
  
  
  
- b. What will your monthly payment be if the interest rate is 4.5%?
  
  
  
  
  
  
  
  
  
  
- c. If you make all the payments for 30 years, how much would you have paid for the house in total?
  
  
  
  
  
  
  
  
  
  
- d. In part b above, what number would you get if you switch the 0 and the 315,000? Why are the answers so different? Explain the difference between these two scenarios.

## 4E: Federal Income Taxes

10. Separate the tax table page and calculate the values for each household and determine the amount they owe or will be refunded.

<b>2018 Tax Year</b>	Dakota and Avery (no children)	Letitia (2 children)
<b>Filing Status</b>	Married Filing Jointly	Single (Single means she is not claiming her kids on her return, another parent is)
<b>Adjusted Gross Income</b>	\$93,700	\$42,600
<b>Itemized Deductions</b>	\$17,200	\$5,700
<b>Standard Deduction</b>		
<b>Taxable Income</b>		
<b>Tax from Table</b>		
<b>Tax Credits</b>	\$0	\$426
<b>Tax Amount after Credits</b>		
<b>Federal Taxes Withheld</b>	\$14,570	\$4,230
<b>Federal Tax Owed or Refund</b>		
<b>Effective Rate (Tax amount after credits ÷ taxable income)</b>		

<b>2018 Tax Year</b>	Joshua (3 children)	Karalene (no children)
<b>Filing Status</b>	Head of Household	Married Filing Separately
<b>Adjusted Gross Income</b>	\$38,200	\$125,400
<b>Itemized Deductions</b>	\$7,800	\$8,500
<b>Standard Deduction</b>		
<b>Taxable Income</b>		
<b>Tax from Table</b>		
<b>Tax Credits</b>	\$2,049	\$0
<b>Tax Amount after Credits</b>		
<b>Federal Taxes Withheld</b>	\$3,850	\$23,490
<b>Federal Tax Owed or Refund</b>		
<b>Effective Rate (Tax amount after credits ÷ taxable income)</b>		

11. Below is a portion of the 2017 tax year tax schedule from the form 1040 booklet.

a. Find the tax amount for a single person with a taxable income of \$39,890.

b. Find the tax amount for a married couple filing jointly with a taxable income of \$45,350.

c. Find the tax amount for a single dad filing as head of household with a taxable income of \$42,102.

2017 Tax Table — Continued

If line 43 (taxable income) is—		And you are—				If line 43 (taxable income) is—		And you are—				If line 43 (taxable income) is—		And you are—			
At least	But less than	Single	Married filing jointly *	Married filing separately	Head of a household	At least	But less than	Single	Married filing jointly *	Married filing separately	Head of a household	At least	But less than	Single	Married filing jointly *	Married filing separately	Head of a household
		Your tax is—						Your tax is—						Your tax is—			
<b>39,000</b>						<b>42,000</b>						<b>45,000</b>					
39,000	39,050	5,495	4,921	5,495	5,186	42,000	42,050	6,245	5,371	6,245	5,636	45,000	45,050	6,995	5,821	6,995	6,086

12. Here are some scenarios that compare 2017 taxes (labeled "Current Law" below), with the new tax law that takes effect in the 2018 tax year (labeled "Proposed" below).

<https://taxfoundation.org/final-tax-cuts-and-jobs-act-taxpayer-impacts/>

## Impacts of the Tax Cuts and Jobs Act

								
	James	Jason	Amber	Kavya and Nick	Sophie and Chad	Soren and Linnea	Laura and Seth	Joe and Ethan
Ordinary Income	\$30,000	\$52,000	\$75,000	\$85,000	\$165,000	\$325,000	\$2,000,000	\$48,000
Marital Status	Single	Single	Single	Married	Married	Married	Married	Married
Earners	1 earner	1 earner	1 earner	1 earner	2 earners	2 earners	1 earner	Retired
Children	No kids	2 kids	No kids	2 kids	2 kids	3 kids	2 kids	n/a
Tax-Deferred Retirement Contributions	\$2,600	\$4,000	\$5,500	\$5,500	\$20,000	\$37,000	\$18,500	\$0
Itemization	Std. Ded.	Std. Ded.	Std. Ded.	Std. Ded.	Itemizing	Itemizing	Itemizing	Std. Ded.
Current Law	\$4,331	\$5,198	\$16,104	\$11,035	\$29,345	\$71,629	\$713,234	\$3,497
Proposed	\$3,953	\$3,306	\$14,327	\$8,782	\$27,122	\$62,012	\$694,330	\$3,227
Tax Liability Change	-\$379	-\$1,892	-\$1,777	-\$2,254	-\$2,224	-\$9,617	-\$18,904	-\$270
% Tax Liability Change	-9%	-36%	-11%	-20%	-8%	-13%	-3%	-8%
% Change in After Tax Earnings	1.26%	3.64%	2.37%	2.65%	1.35%	2.96%	0.95%	0.56%

Note: Tax burden figures do not include employer-side payroll taxes. These results are for 2018, and do not reflect the expiration of many individual provisions.  
Source: Tax Foundation calculations.

a. Look at the "Tax Liability Change" row. Who saves the most money under the new plan? Who saves the least?

b. Look at the "% Tax Liability Change" row. Who saves the largest percentage on their taxes? Who saves the smallest percentage?

**Challenge Problem**

Sage deposited \$2498 into an account paying 7.05% APR, compounded quarterly. Dionne deposited \$2994 into an account paying 5.19% APR, compounded monthly. How many years will it take for their balances to (nearly) match?

Write a spreadsheet formula for each person, using a cell reference for the year. Then you can copy the formula down using the fill-down feature.

Year	Sage	Dionne
1		
2		
3		

**Round-Robin Problems.** Choose two people from your group to travel together and two to stay. Use the space below to write your formula for each problem.

1.

2.

3.

4.

5.

More Practice

1. Use the **2018 tax tables** to answer the questions and show your steps. The tables will be given to you with any test. Write your answers in complete sentences.

a. Mariana is single and has \$11,402 in itemized deductions. What is her standard deduction and should she claim the itemized deductions or the standard deduction?

b. Vy has a gross income of \$129,500 and he filed as the head of household with 2 kids. He had \$6,500 in itemized deductions. Determine his deduction and calculate his taxable income.

c. Alex and Jesse are married, filing jointly. Their taxable income is \$96,210. Calculate the amount of tax they owe using the appropriate table.

d. Tim had \$8,420 deducted from his paychecks in withholdings. He calculated his taxes owed to be \$7,952. Does he get a refund or owe money and what is the amount?
